

Pochin's PLC
Interim results for the 6 months ending 30 November 2007

HIGHLIGHTS

- Turnover up at £54.4m
- Profit before taxation at £2.1m
- Interim dividend maintained at 3.0p
- Pension fund deficit eliminated
- Healthy contracting order book
- Improved performance from Construction Services following reorganisation

CHAIRMAN'S STATEMENT

Results

The results for the 6 months ended 30 November 2007 show pre-tax profits of £2.1m (2006: £4.4m) on turnover of £54.4m (2006: £53.2m). The result for 2006 included a pension credit of £2m. An interim dividend maintained at 3.0p (2006: 3.0p) is declared.

Divisional Reports

Contracting

Turnover for the period was ahead of last year's equivalent. The division carries forward a healthy order book of £88m. A disproportionate number of projects will complete in the second half of the group's financial year. While the modest first half loss is disappointing, the result for the year as a whole will be more acceptable if these projects conclude according to forecast.

Construction Services

This division continued to perform steadily with an improved contribution to the group's profit. Market conditions remained favourable up to (and beyond) the half year. As ever, the start of the new calendar year is dependent on reasonable weather conditions.

Property

During the period, the commercial property market experienced a striking change in conditions. As foreshadowed in the annual statement and described in the interim management statement released in November, there has been a marked adverse shift in property values in general, partly as a result of the re-assessment of the cost and availability of credit. The volume of reported market transactions has reduced significantly, and the group has suffered delays in the completion of a number of important property disposals. As the new terms for property lending become more perceptible, commercial property transactions should resume, albeit on a reduced scale.

The group has increased its investment in joint venture projects. It is pleasing to report that lettings at Manchester Technopark have increased sufficiently to create additional value which has been reflected in these results.

Residential

The general slowdown in the housing market has been well publicised, and Pochin Homes is experiencing reduced levels of demand. Lower interest rates in time for the Spring season would help stimulate this market.

General

Pochin comprises two trading divisions and two asset based divisions, a diversity which provides a welcome variety of cash profiles and capital growth opportunities. The abrupt change in financial markets has brought about a value adjustment which will test the efficacy of this amalgam. So far, the trading divisions have performed relatively well, and the strength of the group's balance sheet will enable it to withstand the effects of the re-assessment of risk which markets now reflect. Given its well deserved reputation as an established contractor, and its involvement in high quality developments, the group is well placed to benefit when more stable market conditions become established. Further delay in the property disposals referred to above would have an impact on the final result for the year.

Notes

1. The interim report was approved by the board on 24 January 2008.

2. Basis of preparation

The interim financial information has been prepared applying the accounting policies and presentation that were applied in the preparation of the group's published consolidated financial statements for the year ended 31 May 2007.

3. Segmental information

For management purposes, the group is currently organised into four operating business segments: Contracting, Property, Residential and Construction Services.

As operations are carried out entirely within the UK, there is no secondary segmental information. Inter segmental pricing is done on an arms length open market basis.

4 Taxation

The taxation charge is calculated by applying the estimated effective annual tax rate to the profit for the period. The tax assessed for the period is lower than the standard rate of corporation tax in the United Kingdom as a result of the utilisation of losses in joint venture companies.

5 Dividends

	6 months ended 30 November 2007 £'000	6 months ended 30 November 2006 £'000	12 months ended 31 May 2007 £'000

	1,300	1,248	1,872

The interim dividend of 3.0p (2006: 3.0p) per share will be paid on 7 April 2008 to shareholders on the register at 8 February 2008.

The dividend has not been included as a liability as at 30 November 2007.

6 Earnings per share

The calculation of earnings per share (basic and diluted) is based on group profit after taxation and minority interests of £2,126,000 (2006 : £2,611,000) and the 20,800,000 ordinary shares of 25p in issue at 30 November 2007 and 30 November 2006.

The number of shares in the calculation has been reduced at 30 November 2007 for the 449,500 (2006 : 686,000) shares held in the Employee Share Trust. Basic earnings per share is 10.4p (2006: 13.0p). The assumed conversion of dilutive options increases the number of shares by 38,000 (2006: 168,000) shares and so diluted earnings per share remains at 10.4p (2006:12.9p).
